18. (NEW) A method for conducting on-line commerce, comprising the steps of:

enabling a shopper to selectively designate a list of a plurality of items;
searching for all items simultaneously in said list on a plurality of data sources;

displaying information found regarding said all items; and
purchasing on-line said all items or some items in said list.

19. (NEW) The method according to Claim 18, wherein at least one of the plurality of data sources is a website.

20. (NEW) The method according to Claim 18, wherein at least one of the plurality of data sources is a database.

21. (NEW) The method according to Claim 18, further comprising the step of:
enabling the user to selectively specify at least one of the plurality of data sources to be searched.

22. (NEW) The method according to Claim 18, wherein at least one of the plurality of data sources is at least one default data source.

23. (NEW) The method according to Claim 18, wherein the displaying step includes the step of:

Pat App. S/N 09/833,956

Lin-Hendel 9

displaying results of the searching step simultaneously on a display device for viewing by the user, the results providing said information regarding said all items searched.

24. (NEW) The method according to Claim 23, wherein if a particular one of the plurality of data sources that was searched does not have a particular one of the plurality of items available for sale, information for that particular data source indicates if any of the other plurality of data sources has the item available for sale.

25. (NEW) The method according to Claim 23, wherein displaying step further includes the step of:

displaying the results of the searching step in a plurality of lists, each one of the plurality of lists displaying search results from a different one of the plurality of data sources searched.

26. (NEW) The method according to Claim 25, wherein the purchasing step includes:

simultaneously purchasing said all items or said some items in said list.

27. (NEW) The method according to Claim 18, wherein the displaying step comprises the step of:

displaying results of the searching step based on user specified criteria.

Lin-Hendel 9

28. (NEW) The method according to Claim 18, wherein the searching step comprises the step of:

searching certain ones of the plurality of data sources in a prioritized order.

29. (NEW) The method according to Claim 18, further comprising the steps of:

displaying a list of data sources to the user;

prompting the user to edit the list of data sources;

editing the list of data sources to create specified data sources; and

searching both the specified data sources and default data sources for the items on the list.

30. (NEW) The method according to Claim 18, wherein the list of the plurality of items is a shopping list.

31. (NEW) The method according to Claim 18, further comprising the step of:
prompting the user to exclude certain ones of the plurality of items from being included in the search.

32. (NEW) The method according to Claim 18, wherein the plurality of items include different types of items.

Pat App. S/N 09/833,956

Lin-Hendel 9

33. (NEW) The method according to Claim 18, wherein the purchasing step includes the step of:

placing an order for each item, at a corresponding one data source, selected and approved for purchase by the user.

34. (NEW) A method for conducting on-line commerce, comprising the steps of:

enabling a shopper to selectively designate a shopping list of a plurality of items;

searching for all items simultaneously in said shopping list on a plurality of data sources;

displaying information found regarding said all items; and

simultaneously purchasing on-line said all items or some items in said list.

35. (NEW) The method according to Claim 34, further comprising the steps of:

displaying a list of data sources to the user;

prompting the user to edit the list of data sources;

editing the list of data sources to create specified data sources; and

searching both the specified data sources and default data sources for the items on the list.

36. (NEW) The method according to Claim 34, wherein the purchasing step includes the step of:

placing an order for each item, at a corresponding one data source, selected and approved for purchase by the user.

37. (NEW) The method according to Claim 34, wherein if a particular one of the plurality of data sources that was searched does not have a particular one of the plurality of items available for sale, information for that particular data source indicates if any of the other plurality of data sources has the item available for sale.
